

GIA[®] GIA Gemological Report

Sapphire Origin Report

GIA Report 1236984987

July 09, 2026

Image is not to scale. Color is approximate.

Sapphire

Sapphire is mostly thought of as blue in color, however the name refers to every color of the mineral corundum, except red (which is ruby). The name comes from the Greek sapheiros, which means "bright blue stone." Ancient Mediterranean cultures prized sapphire above all other gems. Today, the most highly prized blue sapphire is sourced from Kashmir, India. Other significant sources include Myanmar, Thailand, Sri Lanka, and Madagascar.

Characteristics

Mineral	Mohs Hardness	Toughness	Birthstone
Corundum	9	Excellent	September

Details

Item Description

One loose stone

Weight

1.15 carats

Measurements

8.45 x 5.56 x 3.22 mm

Shape

Pear

Color

Pinkish Orange

Transparency

Transparent

Cutting Style: Crown

Modified Brilliant Cut

Cutting Style: Pavilion

Step Cut

Results

Species

Natural Corundum

Variety

Natural Padparadscha Sapphire

Geographic Origin

Sri Lanka

Additional Results

No Indications of Heating

Comments

The color of this stone may temporarily change when exposed to ultra-violet light or when left in the dark for extended periods of time.

Any statement on geographic origin is an expert opinion based on a collection of observations and analytical data.

FACSIMILE This is a digital representation of the original GIA Report. This representation might not be accepted in lieu of the original GIA Report in certain circumstances. The original GIA Report includes certain security features which are not reproducible on this facsimile.
